

Setup and Installation

Posted by teresita - 2010/05/03 22:02

Hi everybody:

Can you help me? I'm having some problems with the installation process. attached some imagines display the message error.

There were no images in your post. What version are you trying to install?

Hi Teresita,

There are still no images attached to your post. The resolution limit is 1600x1200 and the size limit is 150 KB. After you try the attachment again, check and make sure it was included. If not, you can edit the post and try the attachment again and you won't have to post a new message.

Shea
